

Dedicated cochlea package
for intraoperative 3D C-arms

AHEAD

WITH CMOS

THE REVOLUTION IN 3D IMAGING ZIEHM VISION RFD 3D

- **Specialized cochlea package for intraoperative 3D imaging** with 10 cm x 10 cm x 10 cm edge length
- **Technological leadership** with CT-like image quality
- **High-resolution imaging** with 512^3 voxel for much more precise localization of electrode carrier in CI
- **Benchmark dose settings** and uncompromising image quality

CMOSLINE

CMOSline represents a system configuration that is based on a Ziehm Imaging CMOS flat-panel detector.
