## X-ray battery mobile system

### High power generators

High frequency constant potential generator, with self-diagnosis indicators and tube protection circuitry, to extend tube life and increase system performance.

### Mobility

Maximum visibility and perfect mobility, thanks to the collapsible column, the telescopic arm and the servo-assisted driving.

### Workstation

On-board workstation with 17" touch screen for acquisition and process of X-ray images from the digital detector, with full integration of all elements of the system (generator, safety systems, detectors)

### Autonomy

Two separate battery modules, one for the generator X-ray exposures and one for the motors. Hours of autonomy are granted.

# Raybow dR-C

## Extended accessibility

The rotating and collapsible column and telescopic arm provide the flexibility and operability needed to perform any kind of X-ray exposure

Front Bumper to stop motor movement in the event of a frontal collision.

The handlebar internal sensors control the direction and speed of each wheel, proportional to the applied pressure.

Easy controls to adjust the position of the unit when the Operator is in front of tube assembly.

Detector and battery holder, with charging capability.

# Raybow dR-C

Digital diagnostic power on the move

Raybow dR-C is the perfect choice in ICUs, NICUs, emergency rooms and operating theatres, wherever bedside examinations are a critical part of the care process.

The choice of wireless detector panels facilitates faster patient management and increases comfort of use for both Patient and Operator.

The result is improved efficiency of bedside imaging and streamlined workflow through full integration with RIS/PACS.

**primax**  
INTERNATIONAL

Powered by PRIMO, professional acquisition software for X-ray images, with wide selection of flat panel and multi-detector operation.

Software controls X-ray generator, providing a smooth and streamlined workflow.

The professional image processing can be adapted to individual user needs and provides a complete control of all image capture, with instant diagnostic capability and immediate connection to PACS

Integrated functions and intuitive operation greatly simplify daily routine tasks.

# Raybow dR-C

## Anytime, Anywhere

### Global Support

Primax International provide technical support for its products throughout their useful life, wherever they may be used.

### Remote Support

Modularity is native to the Raybow dR-C, making remote support as easy as can be, whether you need to perform efficiency tests, software upgrades or maintenance.

### Local Support

Technical training courses are regularly provided in the facilities of the group. They enable service engineers to install and service our range of equipment.
